**DETAILED ACTION*****Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 28 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6,076,482 to Ding et al.

3. Ding et al. disclose a reaction chamber comprising: an upper wall (Figure 3, 120), a lower wall (not numbered) and a plurality of side walls (inner side wall--around substrate holder and outer side wall--100--around processing area) configured to process a semiconductor wafer substrate at reduced pressures; at least one of said upper and lower walls being formed of two flat, angled segments (in Figure 3 central most wall) that have surfaces facing an interior of the chamber and that form an interior angle of less than 180°, wherein surface of the segments that face an exterior form an exterior angle of more than 180°. The angle between the horizontal upper most portion of the ceiling and the downward sloping part of the ceiling meet the claimed angle specifications.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 29-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 6,076,482 to Ding et al. as described above and in view of further teachings of Ding et al.

Art Unit: 1763

6. Ding et al. disclose the invention substantially as claimed and as described above.
7. However, Ding et al. fails to teach the specific angles and wall dimensions of the claims.
8. Ding et al. do teach that the contours and dimensions of the walls can be varied to optimize performance (column 4, rows 48-53 and column 6, rows 40-44).
9. It would have been obvious to one of ordinary skill in the art at the time the Applicant's invention was made to have provided an optimally contoured and dimensioned ceiling in order to optimize performance as taught by Ding et al.

***.Allowable Subject Matter***

10. Claims 1-14 allowed.
11. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or fairly suggest a reaction chamber comprising a chamber upper wall and a chamber lower wall; wherein said chamber upper wall and said chamber lower wall each comprise two, flat rectangular segments that are slightly out of parallel such that each of said chamber upper wall and said chamber lower wall have a pitch that points in the same direction as the pitch of the wall, and wherein the pitches of the upper and lower walls point away from each other. Further no other piece(s) of properly combinable art were located that provided sufficient motivation for adding this feature to the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1763
